

for the **MASSES**

Programs Are Now Available To Meet Any Budget

"We used to only propose the Maestro Personal Assistance Service to clients that could afford a price point greater than \$4.00. With this new approach and pricing structure, we literally pitch the concept to every client no matter the budget. It makes sense for every industry we deal with!"

"Great Idea Maestro!"

In today's highly competitive promotions and incentives marketplace, your ability to continuously propose new ideas and products directly affects your bottom line. Maestro has added new programs and distribution methods that allow you to include access to Maestro's Live Personal Assistants with every product and program you propose.

Depending on the size, delivery method and anticipated redemption of the program, we can put together campaigns that will fit every one of your client's budget. Please contact your Maestro representative with every customer you intend to visit or propose and let us come up with a creative way to include Maestro in their program.

Maestro now has the capability to orchestrate cell phone text message marketing campaigns to the end users that take advantage of the offers that you and your clients put together. Now your clients can have an additional marketing outlet to reach their clients directly and very inexpensively. Talk to your Maestro Representative for more information.
